

# IS Mapping Integration

---

## Order Procedures for GIS Mapping Integration

1. Complete the order form and include the P.O. # (if any).
2. Fill out the attached StreetSaver® GIS Toolbox Custom Shapefile Worksheet. In addition to the basemap, up to four (6) layers of shapefiles are included in the price. Examples of layers are maintenance zones, district council boundary, city limits, and redevelopment district, block address, etc. Include the worksheet with your order form. The number of additional layers of shapefiles must be identified at the time of the order. Any additional layers requested after such time will be subject to an additional charge
3. Once the order form and GIS worksheet are complete, email them to [mtcnotify@devmecca.com](mailto:mtcnotify@devmecca.com) .
4. Once MTC receives the order form you will receive, via email:
  - a. An invoice which can be paid by credit card (via PayPal) or check.
  - b. An ftp upload link, so that you can upload your shapefiles.
5. Upon completion of the GIS mapping integration, MTC will notify the agency.

## Important Notes:

1. Exact matching (i.e. fully linked) of the StreetSaver data to the agency's shapefile cannot be guaranteed.
2. This is a one-time GIS mapping integration charge and does not cover subsequent additional or updates of GIS layers. Additional layers or update can be integrated at \$250/ layer.
3. GIS integration is based on using agency's GIS map plus 6 additional layers. Any Inventories greater than 5,000 sections cost is \$6,650.
4. Agency's Centerline shapefile needs to include a Unique ID field with a data type of Integer. If it does not, one will be created for you. These ID values must be maintained by the Agency for subsequent updates of new streets unless the Centerline shapefile has StreetID and SectionID information included.
